

Accessing work on Education City and My USO

Every child has been issued with a login for the learning websites EducationCity and My USO. You should be able to find the login details in your child's reading journal within the next day or so, and we have asked for all the reception logins to be e-mailed home so that you all have an electronic copy of your child's details.

Accessing Education City:

Login to the website: <https://www.educationcity.com/>

Log in using your child's username and password and selecting the country.

Click on the table on the left hand side that says: CLASSWORK

You will then find folders containing activities that your child can work on. As teachers, we can see what the children are accessing and how they are doing on these activities.

Accessing My USO

Go the website: <https://my.uso.im/>

Choose the RED login in option titled USO Login

Enter your child's details and then a page will appear with a variety of suitable games and activities that the children can use to enhance their learning.
